

# Bài 1:

```
1 class Vehicle {  
2     String color color;  
3     String model;  
4     void run () {  
5         System.out.println (model + " màu " +  
6             color + " đang chạy --");  
7     }  
8 }  
9 class Bicycle extends Vehicle {}  
10 class Car extends Vehicle {}  
11 public class Main {  
12     public static void main (String [] args) {  
13         Bicycle bike = new Bicycle();  
14         bike.color = "Đen";  
15         bike.model = "Xe đạp leo núi";  
16         bike.run();  
17     }  
18 }
```
